	<b>Aim</b>	<b>2007 achievements</b>	<b>2008 targets</b>
<b>Our approach</b>	To operate responsibly and build sustainable homes and communities	Taylor Woodrow and George Wimpey were two of only three housebuilders to score over 70% in a sustainability benchmark	Our high level Corporate Responsibility Committee will continue to ensure that the Company maintains high standards of corporate responsibility
<b>Supporting local communities</b>	To be a good neighbour in the communities in which we operate	Won 10 awards from the Considerate Constructors Scheme for building in a considerate manner	Seek to further improve community engagement and implement our new charitable policies
<b>Better by design</b>	To use design to enhance the homes and communities we build	Received a series of high profile awards for design and innovation	Improve design and build quality in all regions in which we operate
<b>Environmental sustainability</b>	To build environmentally friendly homes and communities	Integrated a wide range of environmental features into our developments	Improve the energy and water efficiency of the homes we build
<b>Enhancing economic growth</b>	To contribute to the local economies in which we operate	Contributed over £89.5 million in UK planning obligations as well as providing affordable housing and employment opportunities	Further develop our G2 brand of low cost, high quality housing aimed at first time buyers
<b>Customer care</b>	To provide the highest levels of customer care	Developed new Taylor Wimpey systems and processes	Implement and embed our new customer care practices
<b>Employees</b>	To attract, develop and retain the highest calibre of employees	Focused on open and fair treatment of employees during the merger process	Bring the culture of our former businesses together to create industry leading employee teams
<b>Health, safety and environmental (HSE) management</b>	To provide safe and healthy workplaces and minimise environmental impact	Integrated systems and processes and introduced a comprehensive new UK HSE manual	Implement and embed our HSE management systems
<b>Supply chain management (SCM)</b>	To maintain effective and fair SCM procedures	Analysed historical approaches to SCM to identify best practice going forward	Integrate our systems and processes as well as reviewing green procurement practices
